**Get ready**

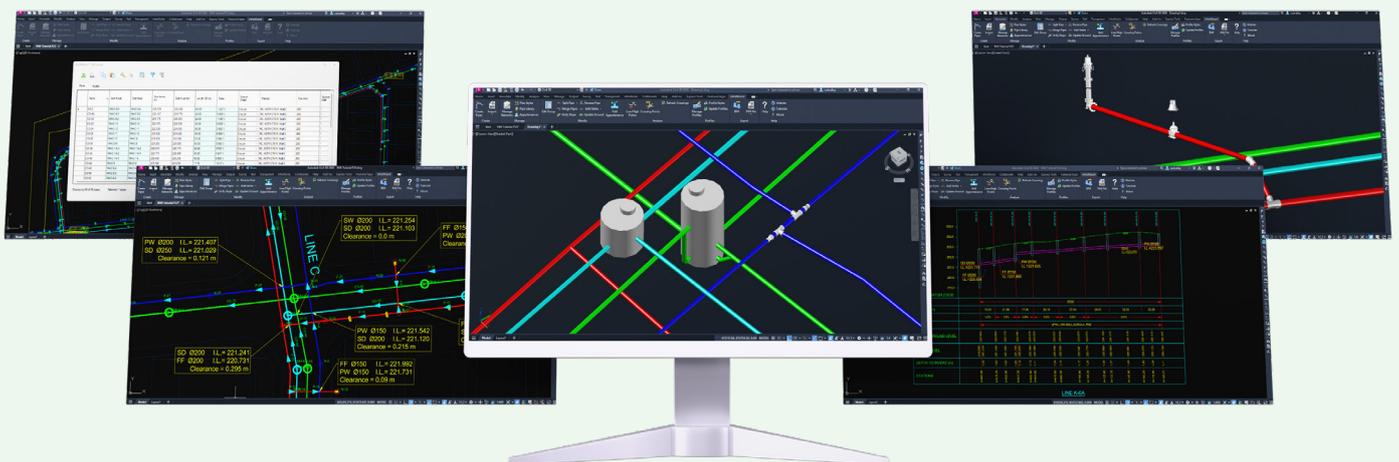

to work smarter with  
**infraWizard** the Innovative  
AutoCAD Add-in for Utility  
Networks Design

cadvalley

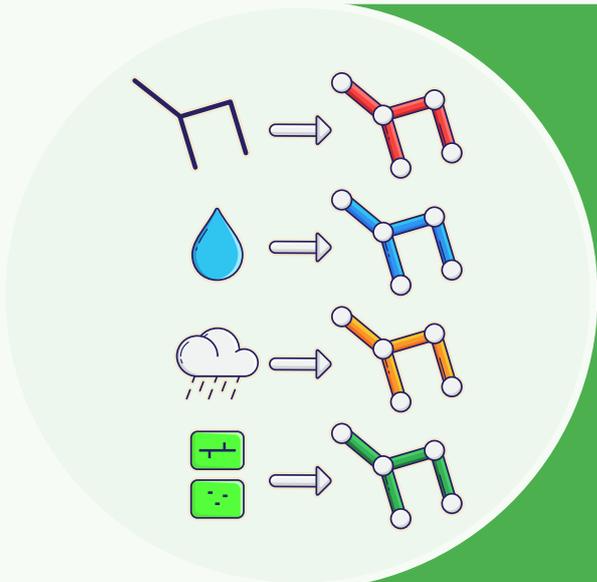

[www.infrawizard.com](http://www.infrawizard.com)

**InfraWizard** is a powerful yet affordable AutoCAD® add-in that redefines the way infrastructure design is done. Built to close the gaps in traditional workflows, it empowers engineers with smart, intuitive tools to boost productivity, ensure precise spatial coordination, and deliver top-quality design outputs faster than ever before.

# How it works

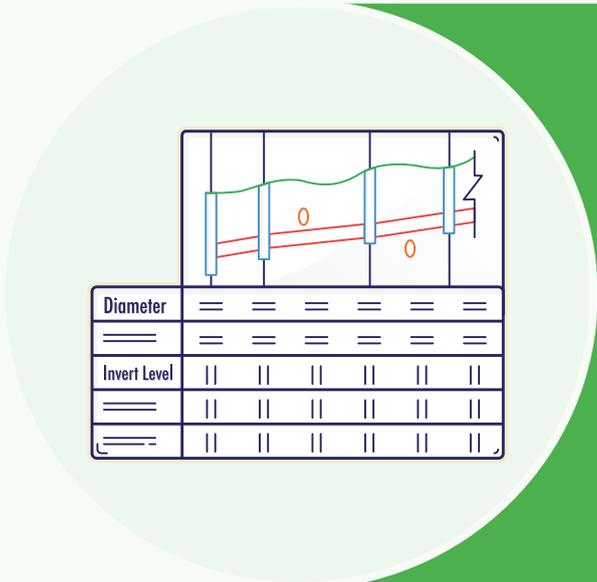

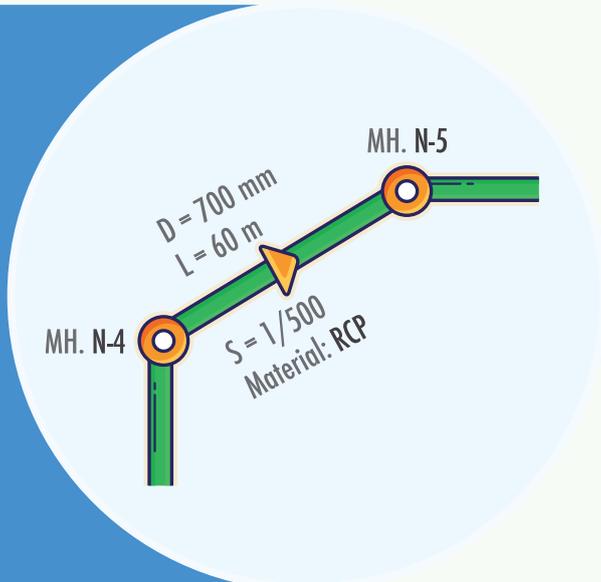

## CREATE NETWORKS IN JUST A FEW CLICKS

With the innovative infraWizard app, you can create pipe networks simply by converting AutoCAD entities into pipes, or by importing from other sources such as hydraulic modeling applications. Super flexible, infraWizard allows you to import data in several formats including Shapefiles, EPANET and EPASWMM files. Any missing data can be manually defined or calculated during the importing process.

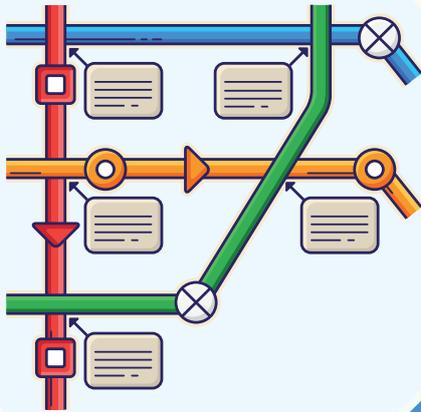

## STYLE YOUR PLANS FLAWLESSLY

Wish you could create plan styles that keep your plans as clear and informative as possible? infraWizard has you covered. With infraWizard, you'll be able to add annotations to pipes and nodes to clearly show geometry information, such as size, invert levels, lengths and coordinates. Plus, take your plan styles even further by using AutoCAD layers, colors, line types and text styles to enrich your formatting.

## CREATE NETWORKS IN JUST A FEW CLICKS

Thanks to one of infraWizard's most innovative features, you'll be able to create first-class longitudinal profiles for pressure and gravity lines in no more than a few clicks. Choose profile elements on your screen, or simplify things even further by using the intelligent automatic selection feature, which will define your profile lines by following the node names or the network hierarchy. Get a single profile or a group of them created in seconds, fully formatted, with data bands and crossing pipes. Not a single touch needed before submission!

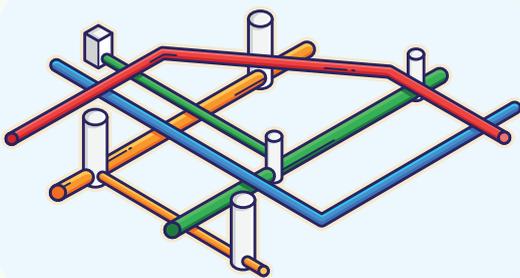

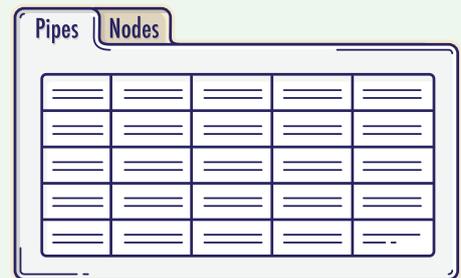

### GET INTERFERENCE CHECKS INSTANTLY

One of infraWizard's most powerful features, Crossing Points Check will automatically and instantly analyze every crossing point between two pipes and calculate the vertical clearance between them. Your crossing points will be annotated while you create, import and edit your pipes. With infraWizard, you'll have full control over which crossings are annotated based on the clearance value and network combinations.

### MAKE EDITING YOUR NETWORKS A BREEZE

infraWizard makes editing your pipe networks geometry easier than ever. All you need to do is double click on a pipe or a node and you can edit levels, sizes, materials and more. Work whichever way is best for you, using infraWizard's intuitive editing tools as well as the standard AutoCAD commands. And even better still, you can also easily modify the properties of a group of elements all at once with the handy Group Edit feature.

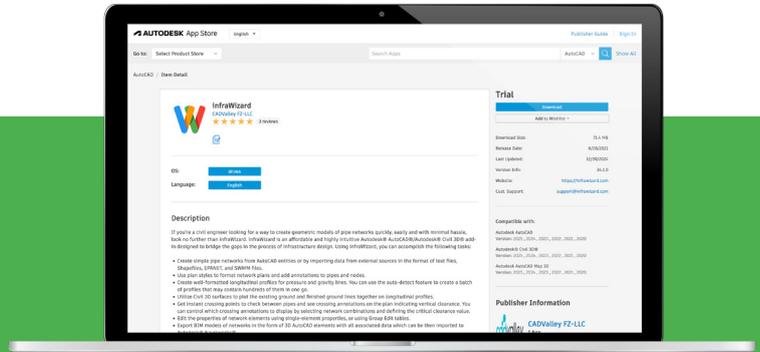

### EXPORT BIM MODELS AT BREAKNECK SPEED

Save yourself even more time and effort by exporting BIM models of networks. This invaluable function will save all data to the BIM model and allow you to quickly and easily integrate your BIM model with other project components on Autodesk Navisworks.

**Rated 5-Stars at  
Autodesk App Store**

## System Requirements

**InfraWizard** is installed as an add-in application for Autodesk AutoCAD, Civil 3D, or Map 3D versions 2022 to 2026, under Microsoft Windows 64-bit operating system.

## Pricing

InfraWizard licenses are offered in three categories according to the maximum number of pipes you can have in a single project.

Free	\$190	\$390
		
<b>250</b> Pipes license	<b>1000</b> Pipes license	<b>Unlimited</b> Pipes license

Note: All prices are exclusive of VAT/GST.

At this time, infraWizard is offered as a single-user license. For teams requiring multiple seats, we offer attractive volume discounts based on the total number of licenses included in your order.

<b>10%</b> 2-4 licenses	<b>15%</b> 5-9 licenses	<b>20%</b> 10-14 licenses	<b>25%</b> 15+ licenses
----------------------------	----------------------------	------------------------------	----------------------------

The above discounts are applied to the total amount of the order.

# License Terms

- **License Type:** Single installation on one computer
- **License Duration:** 1 year
- **License Renewal:** License renewals are not processed automatically. You will receive an email notification 14 days before your license expires, giving you ample time to purchase a new one.
- **License Activation:** InfraWizard is activated using a license key linked to your computer name. You'll receive clear, step-by-step instructions for obtaining your key through our online license registration portal.
- **License Transfer:** Once a license key is issued for a specific computer name, it remains locked for 30 days before it can be changed via the online panel to transfer the license to another machine. If you need to transfer it sooner, simply contact the infraWizard support team for assistance.

## How to Make a Purchase

### 1 - Online Store

You can make a purchase using bank cards issued by Visa or MasterCard through the online store at <https://infrawizard.com/store>.

When you make a purchase through the online store, your order details will be emailed to you immediately so you can proceed with activating your license.

### 2 - Software Resellers

You can also purchase through software resellers in your country, typically an Autodesk Partner. A local reseller will quote the same price listed above, with applicable local taxes added, allowing you to receive a formal Tax Invoice.

If you prefer this purchasing method, we can connect you with one of our resellers, provided we already have one in your country, or you may contact your approved AutoCAD supplier directly to request a quotation for infraWizard.

### 3 - Direct Offline Purchase

You can also purchase offline directly through us via bank transfer. To begin, send a request to [sales@infrawizard.com](mailto:sales@infrawizard.com) and we will issue a quotation for the required license types and quantities. Once we receive your Purchase Order, the license details and purchase invoice will be issued within 24 hours.

The invoice will include our bank account information so you can complete the wire transfer within 30 days of the invoice date. Please note that all purchases made directly through CADValley are exclusive of VAT/GST.

## Who we are and what we do

**CADValley** is an Emirati software development and trading company founded in 2018. As an Autodesk Authorized Developer, we specialize in developing add-in applications for Autodesk products with a focus on the civil engineering industry. We're proud to offer our clients the most efficient and cost-effective ways to create their infrastructure systems design with our simple, smart and affordable software products. Our innovative application infraWizard leads our vision for establishing a comprehensive and hassle-free BIM workflow for infrastructure design.
